ELECTRIC PARK
OPENS MAY 23

Modern Dances Will Not Be Tolerated It Is Announced

The Electric Park, the Houghton County Traction company's popular amusement place, will be formally opened with a concert by the entire Calumet & Hecla band on Sunday, May 24, weather permitting. This announcement was made today by Manager Frank O. Mayotte and brought pleasure to hundreds who will now look forward to pleasurable gatherings at this pretty retreat.

The park will be open for free dancing every Tuesday and Thursday evening from 8:30 to 11:30 p. m., also on Saturday evenings when not engaged for private parties. A splendid orchestra will render music at the park throughout the season and special programs will be provided at frequent intervals. There will be concerts by the C. & H. band on Sundays when the weather permits. Announcement of the program for these concerts will be made regularly.

The management emphatically announces that dances such as the Tango, one-step, turkey trot, hesitation and Boston dip will not be tolerated at any of the public dances or no other dance that is not absolutely above reproach.

There will be no new amusement devices at the park this summer but all of the equipment has been placed in the best of condition, has been repaired and repainted where necessary, and made as attractive as possible.

Both wells have been thoroughly cleaned and cemented on the inside, eliminating the possibility of contamination by surface water. It is possible the company will provide a new kitchen, should the demand warrant.

The park will be open this summer from 7:00 a. m. until 11:30 p. m. and the management will do all in its power to accommodate the public and continue the popularity which the park has enjoyed the last few seasons. Intoxicated or disorderly persons will not be allowed in the park at any time.

The park has been engaged for several parties and social gatherings during the months of June and July.

GOOD RESULTS
FOLLOW EFFORT

Effect of "Safety First" Movement Already Noticeable

Although the campaign has been launched publicly but a few weeks, good results are already attending the "Safety First" movement in the C. & H. and subsidiary mines, according to one who has kept records bearing on this subject. There is a noticeable decrease in the number of minor accidents which result in temporary incapacity and it is apparent the movement is one of great possibilities.

The "Safety First" movement has been but recently organized, but it is really the result of months of gradual preparation which extended for a considerable time before the recent strike and which reached a point where it lacked nothing but the formal organization when the strike began. Accurate records of all of the accidents since the first inception of the movement show a decrease month by month.

The co-operation of the officials and employees and concerted action to remove sources of danger and to restrain foolhardy and careless action is greatly desired in this movement, and as progress in this direction is made it is certain there will be even greater results in reducing the number of accidents.
